

Cell Activator

Every activity you do depends on a constant supply of energy at the cellular level. Many people, because of a poor diet and digestion or high levels of stress, fail to supply their cells with enough essential nutrients. As a result, their energy production slows, and symptoms such as fatigue and immune dysfunction can occur. Herbalife's reformulated Cell Activator is specifically designed to help you make the most of the nutrition you receive, and it enhances overall vitality and well-being.*

Most importantly, the newly reformulated Cell Activator has nine times the amount of Pycnogenol® for a rich source of cell-protecting antioxidant bioflavonoids to enhance blood flow, support normal vascular function, and promote a healthy glucose metabolism.*

To help your body function optimally, Cell Activator contains a proprietary "Cellular Metabolic" blend of select ingredients and several concentrated herbal extracts that protect your cells from stress, demanding lifestyles and poor diet. The combination of essential nutrients and botanicals in Cell Activator are involved in more than 300 metabolic processes and boost antioxidant defense mechanisms.* By using a more bioavailable form of magnesium aspartate, Cell Activator helps fight fatigue, since aspartate feeds into the Krebs cycle, which provides the body with ATP that is eventually converted into energy.*

In addition, the botanicals in Cell Activator, which include Arctic root, Cordyceps, Reishi and Shiitake mushrooms, support vitality through their adaptogenic properties.* Adaptogens are thought to increase the body's ability to resist or adapt to physical or psychological stressors, such as excessive cold, heat or increased workload.

Cell Activator helps your body get the best from both the foods you eat and your other Herbalife supplements by optimizing nutrient absorption and supporting cellular energy production. As a result, you'll have the energy you need to feel great and function at your best.*

FAST FACTS

- Provides even more Pycnogenol®, a potent antioxidant that helps support normal vascular function and healthy glucose metabolism.*
- Aids in the absorption and effectiveness of your vitamin and mineral intake.*
- Contains herbal factors that enhance energy production and support stamina.*
- Helps the body produce and maintain a steady supply of energy.*
